# Hyperbaric Oxygen Therapy

Oxygen Therapy means the delivery of oxygen under pressure. It is also known as Hyperbaric Oxygen Therapy or HBOT

**Hyperbaric Oxygen Treatment** has helped some people with neurological conditions, cancer, diabetes, sports injuries, tinnitus, stubborn infections and ulcers.

It can also speed up wound healing and recovery from radiotherapy damage.

Plus – it's great at combating extreme fatigue like ME /Chronic Fatigue Syndrome. Take a look at our website for more details. Search online for "Hyperbaric" and your condition or interest. Or phone us. **Maybe oxygen treatment could help you?**

*"My oxygen treatments have literally changed my life by helping my cancer recovery in such a huge way,"* Julia B, Herts.

The Oxygen Therapy Service in Letchworth, Herts has provided more than 60,000 treatments since 1988. Our friendly, experienced team will supervise your sessions.
